

ROMOVI SCRIM FABRIC FEEDER (RACF) (FT03)

WORKING WIDTH	Up to 2,500mm(Optional wider)
FUNCTION	Accumulate in the process of roll change, no production stoppages.
CAPACITY	Standard of 80mts maximum accumulation.
SPEED	Up to 80Mts/min, depending on materials.
DRIVES	Servo-motorized and full control of parameters
ELECTRICAL POWER	3Kw 400/460v 50/60Hz.
SYSTEM OF INTRODUCTION	Servo motorized and welder longitudinal and union scrim rolls.
ACCUMULATION SYSTEM	PVC curtain bed, servo motorized, and filling sensors.
WINDING SYSTEM	Servomotorized,pneumatic spreader,electric belt aligner.
CERTIFICATION	EU Certificate, documentation and machine safety.
SIZE	Width 3390mm, Length 3723 mm, Height 1704m
WEIGHT	940Kg.

It can be complemented by additional units to obtain a lamination line of high-volume production of controlled quality.

System of elimination and static energy compensation.
