

ROMOVI FOAM ACCUMULATOR (FT02)

WORKING WIDTH	Up 2,500mm (Optional wider)
FUNCTION	Accumulate in the process of roll change, no production stoppages.
CAPACITY	Standard of 80 mts maximum accumulation.
SPEED	Up to 80Mts/min, depending on materials.
DRIVES	Servo-motorized and full control of parameters with a 7" operator display.
ELECTRICAL POWER	4Kw 400/460v 50/60Hz.
SYSTEM OF INTRODUCTION	Motorized servo and tension and 30/500N sensor-controlled oscillator.
ACCUMULATION SYSTEM	Roller bed, motorized servo and 30/500N tension sensor.
WINDING SYSTEM	Dual bobbin holder, motorized servo and 30/500N tension sensors.
CERTIFICATION	EU Certificate, documentation and machine safety.
SIZE	Depends on the required configuration.
WEIGHT	It depends on configuration

It can be complemented by additional units to obtain a lamination line of high-volume production of controlled quality.

- Foam roll bonding welder
